
Report of Analysis on Cost and Return of China's Milk Cow,
Beef Cattle and Mutton Sheep/Goat Production by Region
(1998-2003)

Finished in March, 2004

Background:

Based on their investigation and research of years and paying attention to the market Variation, as well as integration with survey data of related departments of the state, experts of FoodChina carried out their systematical approach to the cost and return of variety animal and poultry products with different Production scale in different regions. Meanwhile, FoodChina has built the fixed chicken and pig bases in Shandong, which provided the newest material of cost and return in 2003.

It is necessary to point out that based on the detailed all-round data collected for many years, we will use Geographic Information System (GIS) to present the colour maps of main animal and poultry products at the county level to you, and the list of the counties with their livestock on hand or production ranked in the first 100 places; At the same time, the report has covered. the list of major enterprises importing and exporting Main Live-Stock and Poultry Products of China in 2003.

On the bases of the work mentioned above, we completed the work "Analysis Report of Cost and Profit of Key Animal and Poultry Products of China". There are three volumes of this comprehensive report, they are:

"Analysis Report of Cost and Profit of China's Chicken Production by Region ",

" Analysis Report of Cost and Profit of China's Milk Cow, Beef Cattle and Mutton Sheep Production by Region ",

" Analysis Report of Cost and Profit of China's Pig Production by Region ".

You can buy one or two or all of these series reports according to your need.

Objectives:

This research report was engaged with a number of key animal and poultry products, including pig, egg layer, broiler, milk and beef cattle and mutton sheep and goat etc.

The data derived mainly from typical household survey of 60000 families chosen from 1550 counties of China, which was carried out by the related departments of the state from 1998 to 2002.

In order to easy comparison, the related indicators/items were combined reasonably.

Through the systematical analysis of the cost and return of livestock and poultry products with multi-scale of production in different regions of China, it will help you

Analysis Report of Cost and Profit of China's Milk Cow, Beef Cattle and Mutton Sheep Production by Region

to deeper understand the following questions:

What are the characteristics of the main cost components of variety animal products?

How large is the gap between the cost and return of animal products with different Production scale in different regions?

How much is the price of different animal products in different regions? How are they changed?

What kind level is of the fodder requirement of different animal products in different regions? (As the basic element to study the fodder demand of China) Etc.

Through answering the questions mentioned above, you will understand comprehensively to the cost and return of variety live-stock and poultry products in different regions of China, so as the competition capability of China's live-stock and poultry products in the international market.

Special notes:

The production cost of livestock includes variable production cost and fixed production cost.

Variable production fees include the direct production fees, labor fees (fees of workers) and tax, among which,

the direct production fees cover fees of young animals, fees of fine fodder and coarse fodder, fees of fodder processing, fees of water, electricity and coal, fees of medical and health service and epidemic prevention, fees of loss in livestock death and fees of tools and materials etc,

the fixed production fees cover indirect production fees and period production fees etc.

Subscription Price: US\$1,200

Part One: Distribution of China's Milk Cow, Beef Cattle and Mutton Sheep/Goat Production

1 Distribution of China's Milk Cow Production

1.1 Distribution of China's Milk Mow Production by county(with Color Distribution Map by county)

1.2 Characteristics Analysis of China's Top One Hundred Counties of Milk Cow Stock on hand

1.3 Characteristics Analysis of China's Top One Hundred Counties of Milk Production

2 Distribution of China's Beef Cattle Production

2.1 Distribution of China's Beef Cattle by county (with Color Distribution Map by county)

2.2 Characteristics Analysis of China's Top One Hundred Counties of Beef Cattle Stock on Hand

3 Distribution of China's Mutton Sheep/Goat Production

3.1 Distribution of China's Mutton Sheep/Goat by County (with Color Distribution Map by County)

3.2 Characteristics Analysis of China's Top One Hundred Counties of Mutton Sheep/Goat Stock on Hand

Part Two: China's Milk Cow Production of Special Household by Region

4 Characteristics of China's Milk Cow Production of Special Household

4.1 Analysis on China's Milk Cow Production Scale of Special Household

4.2 Analysis on Key Products Output of China's Milk Cow Special Household

4.3 Fine Fodder Depletion of China's Milk Cow Special Household

4.4 Analysis on Labor Requirement of China's Milk Cow Special Household

5 Production Cost and Income of China's Milk Cow Special Household by Region

5.1 Variation of Production Value of China's Milk Cow Production of Special Household

5.2 Variation of Production Cost of China's Milk Cow Production of Special Household

5.2.1 Variation of Direct Production Cost of China's Milk Cow Production of Special Household

5.2.1.1 Variation of Young Animal Cost of China's Milk Cow Production of Special Household

5.2.1.2 Variation of Fine Fodder Cost of China's Milk Cow Production of Special Household

5.2.1.3 Variation of Coarse Fodder Cost of China's Milk Cow Production of Special Household

5.2.1.4 Variation of Epidemic Prevention Cost of China's Milk Cow Production of Special Household

5.2.2 Variation of Labor Cost of China's Milk Cow Production of Special Household

5.3 Net Income Variation of China's Milk Cow Production of Special Household

Part Three: China's State-owned Collective Milk Cow Production by Region

6 Characteristics of China's State-owned Collective Milk Cow Production

6.1 Scale Analysis on China's State-owned Collective Milk Cow Production

6.2 Analysis on Key Products Output of China's State-owned Collective Milk Cow Production

6.3 Depletion of Fine Fodder of China's State-owned Collective Milk Cow Production

6.4 Analysis on Labor Requirement of China's State-owned Collective Milk Cow Production

7 Production Cost and Income of China's State-owned Collective Milk Cow Production by Region

7.1 Variation of Production Value of China's State-owned Collective Milk Cow Production

7.2 Variation of Production Cost of China's State-owned Collective Milk Cow Production

7.2.1 Variation of Direct Production Cost of China's State-owned Collective Milk Cow Production

7.2.1.1 Variation of Young Animal Cost of China's State-owned Collective Milk Cow Production

7.2.1.2 Variation of Fine Fodder Cost of China's State-owned Collective Milk Cow Production

7.2.1.3 Variation of Coarse Fodder Cost of China's State-owned Collective Milk Cow Production

7.2.1.4 Variation of Epidemic Prevention Cost of China's State-owned Collective Milk Cow Production

7.2.2 Variation of Labor Cost of China's State-owned Collective Milk Cow Production

7.3 Net Income Variation of China's State-owned Collective Milk Cow Production

Part Four: China's Beef Cattle Production by Region

8 Characteristics of China's Beef Cattle Production

8.1 Scale Analysis on China's Beef Cattle Production

8.2 Analysis on Key Products Output of China's Beef Cattle Production

8.3 Depletion of Fine Fodder of China's Beef Cattle Production

8.4 Analysis on Labor Requirement of China's Beef Cattle Production

9 Production Cost and Income of China's Beef Cattle Production by Region

9.1 Variation of Production Value of China's Beef Cattle Production

9.2 Variation of Production Cost of China's Beef Cattle Production

9.2.1 Variation of Direct Production Cost of China's Beef Cattle Production

9.2.1.1 Variation of Young Animal Cost of China's Beef Cattle Production

9.2.1.2 Variation of Fine Fodder Cost of China's Beef Cattle Production

9.2.1.3 Variation of Coarse Fodder Cost of China's Beef Cattle Production

9.2.1.4 Variation of Epidemic Prevention Cost of China's Beef Cattle Production

9.2.2 Variation of Labor Cost of China's Beef Cattle Production

9.3 Net Income Variation of China's Beef Cattle Production

Part Five: China's Mutton Sheep/Goat Production by Region

10 Characteristics of China's Mutton Sheep/Goat Production

10.1 Scale Analysis on China's Mutton Sheep/Goat Production

10.2 Analysis on Key Products Output of China's Mutton Sheep/Goat Production

10.3 Depletion of Fine Fodder of China's Mutton Sheep/Goat Production

10.4 Analysis on Labor Requirement of China's Mutton Sheep/Goat Production

11 Production Cost and Income of China's Mutton Sheep/Goat Production by Region

11.1 Variation of Production Value of China's Mutton Sheep/Goat Production

**Analysis Report of Cost and Profit of China's Milk Cow, Beef Cattle and Mutton Sheep
Production by Region**

11.2 Variation of Production Cost of China's Mutton Sheep/Goat Production

11.2.1 Variation of Direct Production Cost of China's Mutton Sheep/Goat Production

11.2.1.1 Variation of Young Animal Cost of China's Mutton Sheep/Goat Production

11.2.1.2 Variation of Fine Fodder Cost of China's Mutton Sheep/Goat Production

11.2.1.3 Variation of Coarse Fodder Cost of China's Mutton Sheep/Goat Production

11.2.1.4 Variation of Epidemic Prevention Cost of China's Mutton Sheep/Goat
Production

11.2.2 Variation of Labor Cost of China's Mutton Sheep/Goat Production

11.3 Net Income Variation of China's Mutton Sheep/Goat Production
